About us:

ACUMAX ENGINEERS is a company formed and promoted by **Mr. B.C. NAWALE** in the year 2012. Its core business includes the manufacture of Indexable Cutting tools holders, holding systems and special tools as per the ISO 9001:2008 standard norms.

The wide and immense experience of the promoter has brought **ACUMAX ENGINEERS** to a new height in the field of tool designing and manufacturing.

ACUMAX ENGINEERING is a customer-focused organization, committed to providing quality products with excellent value additions, technical expertise and prompt service.

Our constant commitment to excel in our customer expectations made for ourselves an unbeaten improvement in our products and services.

Our Product

Our product development team has developed a wide range of Indexable cutting tool holders, boring bars and Tailor-made tools for CNC Lathe machines, VMC, HMC, SPM and conventional machines to suit the customer requirements.

Our Motto

Productivity improvement, Process development and economy in costs are our prime mottos while catering to the varied needs of our customers.

Our Service

Our timely service, continuous and effective report with our customers has paid us with an excellent goodwill in the market. Our service is backed by adequate stocks to ensure timely supply and uninterrupted production runs for our customers.

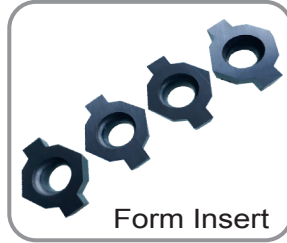

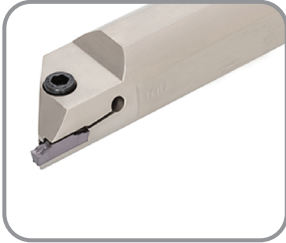

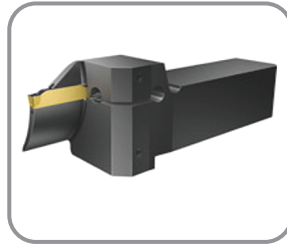

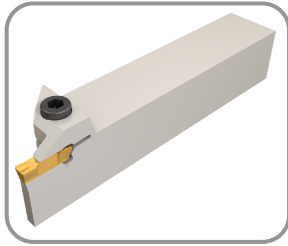

Mission Statement

"Provide best quality products" excellent service to our esteemed customer base to suit their needs and prove to be their best solution partner"
